

## NOTES

This electronic edition is based on the original printed edition of 1906, published by F. Englunds Förlag, Stockholm.

All solutions have been checked by Matthieu Leschemelle's *Problemist* 2.20. All errors have been indicated in brackets in the stipulation as well as in the solutions: [†] indicates a problem without a solution in the stipulated number of moves, and [\*] a problem with more than one solution.

Solutions are given in Swedish/German notation, with KD TLS indicating king, queen, rook, bishop and knight, respectively. Some minor editing of the original solutions have been made.
